

TIMER SFE-EV VIRIDION

DESCRIPTION

SFE-EV Viridion is the latest Pentair eco-friendly innovation featuring smart regeneration, providing users with average water savings of 22%, possibly reaching 40% for some specific applications. This is made feasible thanks to the drain conductivity sensor, the variable brining function and the adaptive reserve capacity, which all combined permit to reach significant benefits and savings. Besides offering high customization possibilities, this controller can manage SIATA valves V132, V230, V250 and V360 in softening versions.

FEATURES

- 15% Average salt saving per regeneration
- Adaptive regeneration cycles
- Average water savings: 22% - can reach 40% for some specific application
- Salt alarm sensor
- User friendly programming for an easy set-up
- Valuable help for service companies: easy monitoring of the performance and troubleshooting
