

# TIMER SFE

## DESCRIPTION

SFE is a performant, easy-to-use and user-friendly controller, thanks to its LCD backlit display and advanced programming options which include up to 4 regenerations phases with independently adjustable cycle times. It is perfectly suitable to all SIATA valves in our range for softening or filter applications.

## FEATURES

- Intuitive 3 push buttons, LCD display backlit during programming mode
- Advanced programming capabilities
- High frequency regeneration (every 1/2/3/4/6/8 or 12 hours)
- Statistic mode
