

# SIATA V360

## DESCRIPTION

The V360 valve is a 3" side mounted valve particularly suited for industrial applications as it allows installations up to 2000 litres of Resin - 55" tanks. It features a special high flow rate piston, ensuring high performances during regeneration, particularly in backwash position. V360 has also reinforced square flanges with aluminium alloy ring for higher resistance to high pressure installations.

## FEATURES

- High flow rate piston
- Valve driver quick connections
- Valve body in ABS material
- DN32 PVC threaded drain

## VALVE SPECIFICATIONS

Service Flow	32 m <sup>3</sup> /h
Backwash Flow Rate	15 m <sup>3</sup> /h
Operating Pressure	2 - 6 bar
Colours	Black
Valve Material	Glassfiber reinforced ABS
Valve Mounting	Side Mounting
