

# CIRCULATION PUMPS

## CIRCULATION PUMPS

Matched circulation pumps are available to provide motive flow through the filter housing.

### Variable differential pressure (Dp-v):

The electronics change the differential pressure setpoint HS to be maintained by the pump linearly between  $\frac{1}{2}$ HS and HS. The differential pressure setpoint H decreases or increases with the flow rate.

**3 speed stages (n = constant):** The pump runs uncontrolled in one of three settable fixed speed stages. Min / Med / Max

## SERVICE KITS

REFERENCE	ITEM NAME	
6108026680	DN20/DN32 Service Kit	
6108026682	DN40 Service Kit	
6108026684	DN50/DN80 Service Kit	

## ADDITIONAL MAGNETS

REFERENCE	ITEM NAME	
1732005914	DN32 Additional Magnet Bar (1 off)	
1732005915	DN40 Additional Magnet Bar (2 off)	
1732005916	DN50/DN80 Additional magnet bar
